

IVAP Household Inclusion Policy

The IVAP is intended to assess every nuclear family residing in KPK that has been displaced as a result of the conflict in Pakistan.

All families will be included in the survey if:

- 1) They self identify as having fled their area of origin due to: 1) individual threat 2) Treat of insecurity 3) Conflict in the area 4) No economic opportunities
 - a. Families who have fled districts that are not considered to be conflict affected (per the government list) *will* be included if they express that they fled due to 1) individual threat
 - b. Families who self identify that they fled their area of origin due to the flood, or any other natural disaster *will not* be assessed
 - c. Families *will not* be denied assessment due to 1) lacking CNIC 2) lacking prior registration as a conflict IDP

In every village/community assessed every effort will be made to work with the community leaders and elders to correctly identify only and all of the conflict IDPs. The protocol for this will be:

- 1) Supervisors will meet at least two and up to seven community leaders and elders in each village/community on the first day of the assessment.
 - a. Form A will be filled that explains the purpose of the IVAP and requests information on approximately how many conflict IDP families are living in the village/community
 - b. Form A will be signed by all leaders/elders present confirming that 1) They have informed the IVAP team of every known conflict IDP family, woman and child living in their community and 2) They have not identified families that are displaced due to the flood
 - c. Form A will contain the names, titles and contact numbers of all leaders/elders involved.

Recognizing that there may be times when the leaders/elders of a community do not agree that a family or group of families is conflict displaced while the families themselves claim to be conflict displaced: the survey teams *will* include the families in the survey.
